

[TYPE THE SENDER COMPANY NAME]

Swedesboro and Cherry Hill Locations

6/22/2020

To Our Valued Patients,

Thank you for choosing Holdbrook Pediatric Dental as your primary dental care provider. It has been an honor serving each of you in your dental needs over the last ten years. In the recent months, it has been evident that we have entered an unprecedented time in the face of the novel coronavirus crisis. Many challenges have been thrust upon us which have required us to implement a fundamental change to our practice.

As pediatric dental specialists our mission has been to improve the oral health quality of life of one of the most vulnerable populations; our children. This practice was founded on the belief that improving long-term health outcomes of each member of our community relied upon establishing dental care and preventive strategies early in our patients' formative years of development and growth. Over our years of service, we found there was a need to support our young patients in their dental care as they transitioned into adulthood. Thus, we expanded our practice to serve and treat adults so that we could continue to build upon the foundation that we established in the children of our community. However, the challenges that the Covid-19 crisis has imposed upon us has called for us to re-examine our ability to fulfill our practice mission effectively.

As many of you know, the Covid-19 crisis has resulted in many changes in regulations that have limited our ability to effectively serve both our pediatric and adult patients of the practice. After much deliberation the decision has been made to limit our practice to the care of pediatric patients once again. We believe this will allow all of our patients, adults and children, to ultimately receive the optimal care that they deserve. Therefore, as of June 22, 2020 we will no longer treat adult patients in our practice.

It is important to us that you are informed of the necessity to continue your dental care with another provider. Dental conditions can worsen over time if left untreated. Therefore, we encourage you to find another provider to monitor your oral health needs. Please contact our office if you are in need of a referral to another provider. Our office is happy to assist you with your transition and provide

your dental records to your new provider upon receipt of a written release. If an emergency arises within the next 30 days, we are available for consultation and will make the appropriate referral.

We appreciate the opportunity to have been of service to you as your dental care provider and wish you the best moving forward. Thank you for your understanding.

Sincerely,

Holdbrook Pediatric Dental
